

Topic: Multiple Matching (Reading comprehension)

The best strategy

- Read the questions or statements and underline the keywords.
- Read each section or paragraph and find sentences matching with any of the questions.
- You can repeat the same to find matching sentences with the other questions too.

An alternative strategy for solving it.

We can also solve this exercise in the following ways:

First of all, read quickly the full passage in the question paper and get a general idea.

Secondly, read again to get the detail idea of the topic.

Finally, read the statements or questions and match with the sentences.

Final tips!

Check for synonyms or paraphrases Underline the sentence in the paragraph which you think is matching with the question.

Your teacher will certainly ask you why you took that answer anyway!

Underline the answer sentence that will help you to find the reasons for your mistakes anyway

Be careful that there will be a lot of views from people.

So let us learn the vocabulary relevant to our reading comprehension.

Last but not least, the tenses in the question and the passage.

Summary

- Skim
- Scan
- Read in detail and match

Reading Exam - Things Not To Do

1. Don't try to answer any questions without looking carefully at the text.
2. Don't waste too much time on a difficult reading exercise. Move on!
3. Don't presume that if you find a key word in both a question and the text, that you have found the answer.
